Dear Paul & Doris

Hi! hope you are fine and doing great. We are all doing well here at home and in good health.

We are not going to school due to the situation right now. Despite being at home our academic work still continues, our elder brothers and sisters are very helpful they act like our teachers when we are at home. We are also using the laptop in getting some revision papers, exams are being given and we are scoring well.

We are learning different types of activities. We are learning how to cook different meals such as crushed beings and breadrolls. We do a lot in our farms, we are planting ~~to~~ fruits like the passion fruits. Some are sewing masks which are bringing in a lot of income.

During our free time we do play different games such as football and volleyball. Some get involved in singing dancing & riding bicycle.

Right now we are staying at home though, we are also putting on our masks throughout the day even though it's boring. We can't go to town to purchase items but we believe in healing very soon.
