Dear Sue

Hello I hope you are faring on well during this quarantine period. Back here in Kenya am fine despite these challenges predisposed by this pandemic

It is now about two months when we had to suspend our normal learning indefinitely because of this pandemic.

After a month being at home the school management decided that learning should atleast be on so that we can finish the remaining lectures. As at the moment we are having our lectures, Continuous Assessment Tests online and this has been effectively by the use of Wifi provided at home.

During my free time I enjoy doing some farm activities like milking, feeding cattle and doing some cultivation at the garden. I also enjoy playing volleyball during my free time with my brothers and sisters.

Life has been hectic to adapt during this quarantine but am catching up. Sanitizing regularly and thoroughly, maintaining social distance, wearing protective masks, no handshake has been the routine exercise. But we have alot of hopes in the lord it will come to an end. Stay safe, Thank you.
