

Dear MARY

Hi hope you are fine and of good health, I am also doing great. I love to hear that you are fine. Despite of the emergency of ~~the~~ corona outbreak we are now at home no learning

Due to the disease that has covered the all world we are at home, learning is through online studies where our teachers sends question we do and give the back for Marking.

We also help our parents at home in doing alot of work such as farm, cleaning flower gardens and do enjoy. We enjoy playing games such as volleyball and soccer

Life has challenge the fact that we are just at home no much interaction like we use to. I personally Miss going for field trips like we are to during school time. At that time I worked with young kids and old people I enjoy My career so much It makes Me to love My social work studies.

Thanks so much as I look forward to
hear from

You.

From your daughter
FAITH TENAI
