

BMCOOZI

Dear Jesse & Catherine.

Hi Jesse and Catherine I hope you are doing very well even me and my fellow kids are doing well the lord has helped us through during this tough season of COVID 19

My life in college is good I am working hard to be one of the best plumbers with quality skills. but since corona started we closed schools and colleges to avoid more infection.

But even if we have closed schools. we are learning online to cover up the syllabus and to gain more knowledge and to perfect on our studies.

What I like most about know is that we have enough time to study and to play alot of games like basket balls, Volleyball, football and chess but what I like most is basket ball and cracking jokes with my fellow friends in horizon.

During this season of COVID 19 our government have set up the precaution that we should follow to avoid infection. even some cities have been locked down the transport system have become hard following some rules have become tiresome but we are making sure that we follow. we are praying hard for this dangerous disease to end for normal activities to go on.

From your lovely son

LABAN KIPIAMUI
