

Dear Brad

How are you Brad? Hope you're fine and of good health. Back at horizon i'm also doing fine. Generally all the kids are faring on well despite the outbreak of the COVID that stopped the normal way of living.

All schools in the country were closed though the government provides some reading materials that are posted at the school websites. Those in colleges and universities either are learning online and also obtaining materials from their respective school library websites.

We are also undertaking different activities like sports at home. These games including soccer and volleyball are being enjoyed by everyone taking place in it. Moreover, the games are bringing fun and happiness that makes life look normal.

Life during quarantine is quite different as before. because we are living under government directives which are taking it positive. Otherwise we are hoping that everything will return to normal.
