

Dear Mandy

Hello Mandy, hope you're doing fine, i'm also doing fine and of good health back in Kenya. At horizon the kids are fairing on well and taking everything positive after the outbreak of COVID-19 that forced the normal school programs to stop.

Currently, by the help of the government directives, most students are being provided with learning materials from school websites, moreover those in colleges and universities are taking their studies through online classes.

At horizon, we are also engaged in different sports activities like soccer, volleyball, chess and basket ball. Everybody is enjoying the games. The happiness and fun during games makes life look normal ~~from~~ despite the COVID pandemic.

COVID has made life to look different in many ways. We are under government directions ~~and~~ directives as we are not allowed to shake hands as we used before. We neither don't hold public gatherings bt all in all we are taking everything positive. Otherwise, we are trusting that everything will be well with time.
