Dear Corrine

Hi! hope you are fine and doing great. We are all doing well here at home and we are in good wealth.

Right now we are not going to school due to the situation we are in. Despite being at home our academic work is still going on well, we are being assisted by our elder brothers and sisters in some areas. Teachers have also provided some revision papers which are being sent through phones and computers. Exams have been produced and the out coming results are excellent.

We are learning how to cook different types of meals such as bread rolls and crushed beans. Others are getting involved in farming and they have different farm projects some are sewing masks which is bringing in a ^{huge} income. New games have also been bought and we are really anxious to know how they are being played.

During our free times we enjoy singing for those who want to be great singers like I do, some get involved in different activities and games such as football, volleyball, chess, Ludo and bicycle riding.

Life is very different from the normal one. We are staying at home throughout and putting on our masks throughout the day. We can't also go to the supermarket. We are also missing our teacher and friends who are at their home. Church services are being attended at family levels we are sitting one meter from each other.

I pray for you. May God bless you abundantly. I love u.
