

DEAR MELISA

Hello Melisa! Kids here in Horizon Initiative we are going on well. Have lovely and caring parents that they provide for us with all the needs we want. All kids are cooperative when assigned in a duty. They are all trustworthy.

Since we were in school life was good becoz we gain knowledge which will help us in future. Teachers have more time with us to teach us on what we have not understood. We cooperate with our teachers and follow instructions that we are given.

Right all schools are at home, but education is a key to success. We are going on with our studies. Teachers are sending assignment in whatsapp which do many people do and are all marked.

Activities or games do they enjoy in free time is playing Valeyball, Soccer, Chess and basketba. For one to be healthy they participate in games that make them perfect.

Life is different during quarantine because now our economy has gone down. Peop are not now travelling or working in many hours. The love that was on first time and now is different, because you cannot shake the hands of people or hug them. Thank you and may God bless you.
