

Dear Robert and Greta.

SPON00109

Hello! Robert and Greta, I write this letter with great hope that you are fine and also doing well together with my brothers and sisters. Sadly enough we are not at school due to the covid 19 crisis that has really affected our learning programme but our parents are doing all they can so as to meet our needs. They are securing various materials for us. We also had a good time to show our talents and that has really helped me to know that I can dance and also act a drama for I know that that is my best talent. I also love to read story books in my free time. Also we competed in sports especially volleyball and soccer. I enjoyed the game. It was worst life during quarantine is a bit different. We are accessing online studies unlike before. We are also trying to put in the measures by the government the covid 19. All in all as far as possible with without surrender I stand to echo that horizon is the best place. I enjoy being in here and happy. May God protect you and Bless your family.

From your loving daughter
Mercy chepchirchir.
