

Dear Beverly

Jambe, I hope that you are fine. I am doing well here in Horizon, Kenya. How is life there? Life in Horizon is fine as a family. We are at quarantine right now in Horizon due to the outbreak of corona virus.

Am in University, doing well with my studies. Am doing Bachelor of arts in Economics and am really happy and thankfull for your support. I am really working hard to emerge victorious in life. We are learning online because we are not going to school during quarantine. Horizon has provided us with internet accessories to learn online and am really thankfull.

We have got some programmes in Horizon to partake apart from studies. We partake on farm work, cleaning and games activities. After working we always rest to regain more energy. We always go for games in the evening. Some of the games activities ~~are~~ that we enjoy ^{playing} are; soccer, volleyball, basketball and chess games. I really appreciate Horizon for uniting us.

Life during quarantine is slightly challenging but am happy because we are able to cope up with it. We have been provided with guidelines during this time of quarantine to avoid being infected with Corona virus. Some of the guidelines are; wearing mask, avoiding crowded places and maintaining high level of hygiene by washing our hands with disinfected soap. Am really thankfull because our parents in Horizon has taken us through the process.

I really appreciate your support. May God continue blessing you.

From Levi Owiyo
